

TASKI® Jontec Extra

F3e

Floor maintainer

Description

Polymer based floor maintainer. Provides a durable film that builds up a good gloss level. In parallel, the detergent content ensures good cleaning performance.

Key properties

- Perfect combination of polymers, waxes and detergents
- Produces a dry-bright, wear-resistant protective film
- Versatile application
- The protective polymer film is fortified with each additional application

Benefits

- Effective floor maintenance and film build up even in high traffic areas
- Creates a slip resistant surface
- Delivers a glossy protection, buffable for extra shine
- Can be used neat for protection and/or diluted for maintenance on all water resistant, hard floors
- Ideal for mop application but also suitable for use in scrubber drier
- Protective film builds up every application and eases the cleaning of the surface

Use instructions

Initial treatment:

1. Dose product as recommended for initial treatment and evenly apply the solution with a polish applicator or a clean fringe mop.
