1. Step:
wood ring

2. Step:
walls

3. Step:
decoration (support)

4. Step:
roof support ring

5. Step:
floors

6. Step:
inside wall

7. Step:
roof

Extension Foundation

It is very important to have a proper foundation.

Therefore we recommend making the foundation according to the sketches here. First of all, foundation must be prepared according to the landscape and ground conditions.

The foundation under the product must be prepared specially, it must be homogeneous, tight and equal. It must be ensured that it will not change its properties. We recommend using concrete foundation. Before installation of product, we recommend to make hydro isolation of foundation.

Consult a local qualified builder or an engineer to prepare a proper foundation, which fits to your location.

Due to improper foundation, cracks in the structures may occur. Due to uneven product seating, the geometric shape of the product may change, which can result in door / window twist, or/and gap may appear. And in the worst case product 's collapse.

If you do not follow recommendation, product will lose its warranty.

ATTENTION !!!
